

# Humble ISD Trustees, parents and students enjoy culminating activities of technology camp

The Humble ISD Instructional Technology Department's Amazing Space Camp, C@mpIT, wrapped up June 20 with a trip to the Insuperity Observatory at Jack Fields Elementary. School Board members Angela Conrad and Charles Cunningham joined the families of the 64 campers as they viewed the skies through the observatory telescopes guided by lead astronomer Aaron Clevenson and volunteers. In addition to visiting the observatory, campers created a video about their chosen space object, posted products to their own webpage, and used a variety of technologies including iPads, MOBIs, creative software and instructional websites. More information about C@mp IT can be found at <http://www.humbleisd.net/campit>
