

MOSAIC Program Thanks Randall Reed and Planet Ford

Randall Reed of Planet Ford recently donated a colorful Ford Expedition to the MOSAIC program. Inspired by the MOSAIC butterfly, the vibrant car would be hard to miss around town. The car will be used for the programs day-to-day transportation for different student activities. It will take the students to job sites, the grocery store, to pick up job applications and even local community recreational establishments.

The MOSAIC program serves students ages 18-22 and focuses on bridging the gap and skills needed for the post-secondary world. With the program growing and doubling in size next school year the car will benefit even more students. Randall Reed and Planet Ford love and continue to support the teachers and students in Humble ISD.

This month and later this year Planet Ford will be hosting a Drive 4 UR School event in April and a Drive 4 UR Community event in September. These events are fundraisers to help the MOSAIC program to purchase the Ford Expedition. For every valid test-drive, Ford donates \$20 to the MOSAIC program. MOSAIC can raise up to \$6,000 each event. April 24 is coming fast and we will need our Humble ISD faculty, staff, family and community to come out and test-drive cars. The more people to come out the closer MOSAIC will be to owning their new Ford Expedition. More information will be provided soon.

Randall Reed and the Planet Ford family's sponsorship and support of Humble ISD is much appreciated and we thank you for all that you do.
