Semifinal Round
A. No reference may be made concerning the name of the team, the team members, or their school.
B. Team members are to write their team identification number in the top right corner of the written analysis.

C. In order to provide a written report/analysis for the on-site problem, participants must be able to complete (at a minimum) the following:
   1. Collection of fingerprints
   2. Collection of trace evidence
   3. Creation of a proportional drawing that accurately represents the crime scene. Note: The crime scene template in the toolkit may be used to create the drawing, but the drawing does not need to be to scale.
   4. Blood spatter pattern analysis
E. The LEAP Response:
   1. Participants document the leadership skills they have developed and demonstrated while working on this event, and on a non-competitive event leadership experience.
   2. Find specific LEAP Response regulations in the LEAP Program section of this guide, and on the TSA website.

EVALUATION

Evaluation is based on
1. Preliminary Round: A team’s written test score
   a. The written test scores of the individual team members will be averaged and recorded as a single team score on the rubric.
   b. Twelve (12) teams with the highest scores will be selected as the semifinalists for the on-site problem.

Before judging an entry, ensure that all items are present; indicate presence with an "X" in the box. If an item is missing, leave the box blank and place an "X" in the box labeled ENTRY NOT EVALUATED; this disqualifies the entry and it is not to be judged.

- Tool kit is present
- Completed LEAP document is present
- ENTRY NOT EVALUATED

Evaluator: Using minimal (1-4 points), adequate (5-8 points), or exemplary (9-10 points) performance levels as a guideline, record the scores earned for the event criteria in the column spaces to the right. The X1 or X2 notation in the criteria column is a multiplier factor for determining the points earned. (Example: an “adequate” score of 7 for an X1 criterion = 7 points; an “adequate” score of 7 for an X2 criterion = 14 points.) A score of zero (0) is acceptable if the minimal performance for any criterion is not met.

### Analysis of Crime Scene (70 points)

#### Primary survey/ walkthrough (X1)

- No initial survey is conducted; no verbal or written attempt is made to document/record the crime scene; furniture or other items are touched or moved.

- A thorough survey of the scene is conducted to prioritize evidence collection; verbal assessment of the scene is made and notes are taken; no furniture or items are moved.

#### Processing the scene (X1)

- Little to no investigation of the scene is evident; no sketches or diagrams are created; proper procedure is not followed for evidence collection, and/or there are obvious signs of contamination.
- A mostly thorough investigation of the scene is conducted and some sketches or diagrams are created; proper procedure is followed for most of the evidence collection, and there are limited signs of contamination.
- A thorough investigation of the scene is conducted and sketches or diagrams are created; proper procedure is followed for evidence collection, and there are no obvious signs of contamination.

#### Evidence collection (X1)

- Three or more pieces of evidence are missing, and/or some of the collected items are not those specified.
- Most pieces of evidence from the team's materials list are included and are correct.
- All pieces of evidence in the team's materials list are included and are correct.

#### Technique (X2)

- Little to no indication of proper technique is used in collecting the evidence.
- Some indication of proper technique is used in collecting the evidence.
- Proper technique is used in collecting most or all of the evidence.

#### Crime scene analysis (X2)

- Written analysis is weak and/or contains personal theories or conclusions; analysis does not clearly provide a detailed summary of the scene, processing, and evidence collection.
- Written analysis is somewhat complete and contains limited personal theories or conclusions; analysis provides a somewhat detailed summary of the scene, processing, and evidence collection.
- Written analysis is strong and does not contain personal theories or conclusions; analysis clearly provides a detailed summary of the scene, processing, and evidence collection.
