

# Weekly Newsletter

## What We're Learning This Week

### Math

This week in Math, we are learning place value and the values of each digit in a number through the billions. We are also discussing different forms of numbers – standard form, written form, expanded form, and expanded notation, as well as comparing and ordering numbers. Please make sure your child is memorizing their 0-2 multiplication facts each night!

### Science

We will begin observing weather maps, predicting weather, weather map symbols, and learning different tools used to observe and measure weather. Later, students will work collaboratively to predict the weather for different Texas cities in a given season, and create a map showing the symbols associated with their forecast!

### Social

We have started discussing our four Texas Regions! We are "touring" all four regions throughout the week and learning their major cities, industries, colleges, and vegetation. We also looked at maps observing the Gulf of Mexico, Mexico, and Texas' surrounding states.

### Reading and Writing

This week in Reading, we will be observing character traits in stories and making personal connections to stories. In Writing, we are reviewing the writing process as well as generating ideas for writing.

## Week of September 11

### Calendar

**9/12:** August Field Trip  
Parent Meeting 6:00 PM

**9/20:** Early Release

**9/27:** Fall Picture Day

**9/28:** Watch D.O.G.S.  
Launch Party 5:30-7  
PM
