

Circuit Test Study Guide

Vocabulary Match

1. **Insulator:** Material that prevents electric current from flowing
 2. **Conductor:** Material that allows electric current to flow through easily
 3. **Current:** The flow of electricity around a circuit
 4. **Energy:** The ability to work
 5. **Circuit:** The pathway through which electrical current flows
 6. **Open Circuit:** An incomplete path that prevents electricity from flowing
 7. **Closed Circuit:** A completed path that can conduct electricity
 8. **Flow:** To move or travel smoothly in a certain direction
- You need to be able to draw a closed and open circuit with labels.
