

Hello!

This is your **MyVRSpot** update! We wanted to let you know that MyVRSpot is ready for use by students and teachers...and administrators too! (**Find it in MyHumble.**)

We've already seen big numbers from those early adopters who have jumped on the MyVRSpot train. So exciting to see! We wanted to let you know that your Campus ITs and TILT teachers have been trained and are able to offer short PD sessions tailored to your campus interests and needs. We recommend doing several short sessions rather than trying to train on the entire MyVRSpot software package. It can do a lot!

Upload YouTube Videos and **other video types** to store, curate, and share with colleagues and students. Yes! YouTube links stored in MyVRSpot WILL work for ALL students...without ads, comments, or the annoying video thumbnails on the side!! All videos can be shared with colleagues or students via shared links, embedded on teacher websites, or shared with a teacher created group.

SmartSpot will enable teachers to create questions to be embedded within the video or to appear at the end of the video! It will keep track of student responses and scores; then, provide a spreadsheet for each video.

These are just 2 of the 6 modules available in MyVRSpot! Watch for more updates coming your way to learn about the other fantastic features below:

- **Recording / Screencasting**
- **Making Groups**
- **MediaSpot Multimedia Docs**
- **Binumi Video Creation Tool**

Training support for your Campus IT and TILT teachers can be found in MyVRSpot at this link:

bit.ly/HUMmvrspotguide

Video playlist training resources for teachers can be found by searching “MyVRSpot Training” in the **Search All Media** bar in the top right area of the home screen.

We can't wait to hear about all the wonderful learning opportunities that our teachers create with **MyVRSpot!**
