

# Humble Independent School District

## 2019-20 Responsible Use Guidelines for Students

With the use of technology, the Humble Independent School District is expanding learning access for students, staff, parents and the entire Humble ISD community. With this opportunity comes the obligation for appropriate and responsible use.

We in the Humble Independent School District are pleased to be able to provide our students, staff and guests access to computer technology, including access to the Internet and a robust network. We are dedicated to the access and support of appropriate technology which unlocks our potential and connects us locally and globally. We envision a learning environment where technology is a part of us, not apart from us.

The operation of technology in the district relies heavily on the proper conduct of the users. Every Humble ISD user has the responsibility to respect and protect the right of every other user in our community. Humble ISD users are expected to act in a responsible, ethical and legal manner, in accordance with the missions and purposes of the resources they use, and with the laws of Texas and the United States.

Adherence to the following is necessary for continued access to ANY and ALL technology resources while at school:

### **Users must respect and protect the privacy of others by:**

- Using only assigned accounts/passwords and not sharing login/password information with others.
- Only using/viewing passwords, data, or networks to which they are authorized.
- Refraining from distributing private information about others or themselves (such as full name, date of birth, address, phone number, Social Security Number, etc.) on blogs, web forms, or other websites using the Humble ISD network.

### **Users must respect and protect the integrity, availability, and security of all electronic resources by:**

- Observing all district Internet filters and posted network security practices.
- Reporting security risks or violations to a designated staff member or an administrator.
- Not accessing data, networks, hardware, software, or other resources that do not belong to them, without clear permission of the owner.
- Not making any changes to settings in hardware, software, or the network.
- Not vandalizing data, networks, hardware or other resources. Vandalism is defined as any deliberate attempt to harm, change, or destroy data or property of another user or Humble ISD, the Internet/Intranet, or other networks.
- Conserving, protecting, and sharing these resources with other users.
- Notifying a staff member or administrator of computer or network malfunctions.
- Not installing software onto computers without appropriate approval.

### **Users must respect and protect the intellectual property of others by:**

- Following copyright laws (not making illegal copies of music, games, or movies).
- Citing sources when using others' work (not plagiarizing).

### **Users must respect and practice the principles of community by:**

- Communicating only in ways that are kind and respectful.
- Reporting threatening or discomfoting materials to a designated staff member or administrator.
- Not intentionally accessing, transmitting, copying, or creating material that violates the Student Code of Conduct and other regulations and school rules (such as messages/content that are pornographic, threatening, rude, discriminatory, or meant to harass).
- Respecting the rights of others by refraining from cyberbullying, harassment or intimidation in messages, blogs,

web content, social media, and other electronic mediums.

- Not intentionally accessing, transmitting, copying, or creating material that is illegal (such as obscenity, stolen materials, or illegal copies of copyrighted works) through messages, blogs, web content, social media, and other electronic mediums.
- Not using the resources to further other acts that are criminal or violate the Student Code of Conduct and other regulations and school rules.
- Avoiding spam, chain letters, or other mass unsolicited mailings.
- Refraining from buying, selling, advertising, lobbying, or otherwise conducting business, unless approved as a school project.
- Only using the Internet and other electronic resources that are in support of education and with the educational goals, objectives, and policies of the Humble Independent School District.

**Users may, if in accordance with the above guidelines:**

- Design and post web pages and other material from school resources. Students may have the opportunity to participate in electronic publishing. Student work or images published on school web pages may include the student's name and the use of personal information will follow the Directory Information Waiver Part I that is signed by the parent. Any information about Humble ISD students or activities, even if hosted on outside servers, should follow Humble ISD web posting policies. The district respects the rights of parents to restrict their children from publishing on the Internet and will secure parent permission for the current school year. Parents will be required to sign a form if they choose to deny having student work, pictures, and/or student's name appear on the Internet/Intranet.
- Communicate electronically via tools such as email, text, or document sharing resources. All accounts with third party providers will be used for school projects and to support the mastery of effective and proper communications. Humble ISD cannot and does not guarantee the security of electronic files located on external repositories. Although these providers have content filters in place, the District cannot assure that users will not be exposed to unsolicited information. All student confidentiality precautions should be followed when using third party resources.
- Participate in video conferencing activities including virtual field trip connections with entities such as zoos, museums, universities, and government agencies. Classes may also participate in point-to-point connections with other classrooms around the district and around the world or multi-point conferences connecting many classrooms. In a distance learning environment, the teacher and students' voice, physical presence and participation in classroom activities will be transmitted to other distance learning sites. These events may or may not be recorded.
- Use the resources for any educational purpose.

**Consequences for Violation**

School computer systems are for use by authorized individuals only. Any unauthorized access to these systems is prohibited and is subject to criminal and civil penalties. Use of any other network or computing resources must be consistent with the rules appropriate to that network.

Use of the district network is not a right, but a privilege, and inappropriate use will result in cancellation of that privilege, disciplinary action, and/or prosecution. Prior to participation, a potential network user will receive information pertaining to the proper use of the network and sign a user agreement. School and district administrators will decide what constitutes inappropriate use of the network and their decision is final. Violations will be dealt with in accordance with the Humble ISD Student Code of Conduct and/or local, state or federal law.

**Supervision and Monitoring**

The information networks are "public places" and user actions are visible to others on the network. Humble Independent School District has the right to monitor network use to ensure that the network continues to function properly for all of its users. Anyone using electronic networks expressly consents to such monitoring. Reports of Internet use are generated for district administrators upon request. Prosecution and/or termination of user privileges will occur without warning.

It is the responsibility of all staff members to educate students about appropriate online behavior, including interactions with other individuals on social networking sites/chat rooms, and cyberbullying awareness and response. This may be done in a variety of ways, such as once a year short training sessions, one-on-one education with individual students, and/or via educational handouts.

It is also the responsibility of all staff members to monitor students' online activity for appropriate behavior. In the classroom, student access to and use of the Internet will be under teacher direction and will be monitored as any other classroom activity; however, it is impossible to control all materials on a global network and users may encounter inappropriate information. Even with filtering the school district cannot prevent the possibility that some users may access material that is not consistent with the educational mission, goals and policies of the school district.

As required by the federal Children's Internet Protection Act (CIPA), each District computer with Internet access shall have a filtering device or software that blocks access to visual depictions that are obscene, pornographic, inappropriate for students, or to any material deemed harmful to minors as defined by CIPA and as determined by the Superintendent or designee.

With access to computers and people all over the world, there may be some material or individual communications which are not suitable for school-age children. The Humble Independent School District views information gathered from the Internet in the same manner as other reference materials identified by the schools. Specifically, the district supports resources that will enhance the learning environment with directed guidance from the faculty and staff.

### **Warranties**

The Humble Independent School District and joint providers of the network make no warranties of any kind, whether expressed or implied, for the services provided. Humble ISD will not be responsible for any damages suffered while using the system. These damages include, but are not limited to, loss of data, delays, non-deliveries, service interruptions caused by the system, or service interruptions caused by errors or omissions of the user. The District specifically disclaims responsibility for the accuracy or quality of information obtained through Internet connections.

### **Accessing the District WiFi Network**

The District believes technology is a powerful tool that enhances learning and enables students to access a vast amount of academic information. The District's goal is to increase student access to digital tools and facilitate immediate access to technology-based information, much the way that students utilize pen and paper. To this end, the District will open a wireless network through which students in specific age groups will be able to connect technology devices for instructional activities. Employees and students using district owned or personal technology must follow the guidelines stated in this document while on school property, attending any school-sponsored activity, or using the Humble ISD network.

- High School – Students are allowed to use district or personal technology devices that can access the Internet for educational purposes as determined by the classroom teacher. Students will be allowed to use the device between classes and in the cafeteria setting in a digitally responsible manner.
- Middle School – Students are allowed to use district or personal technology devices that can access the Internet for educational purposes as determined by the campus and/or classroom teacher. Students will not be allowed to use the devices during passing periods or in the cafeteria, or in any classroom without the express permission of the teacher.
- Elementary – Students in grades K-5 are allowed to use district technology devices and/or personal devices for academic classroom use as determined by the classroom teacher.

When utilizing the district WiFi network, students are expected to adhere to the following:

- The district is not responsible for any content accessed by users who bypass the district Internet filter by connecting to the Internet via their personal cellular network (i.e. 3G, 4G, LTE, etc.), instead of through the district WiFi.
- Users are responsible for backing up their personal data and other important files regularly.
- Those who use district owned and maintained technologies to access the Internet at home are responsible for the set-up and cost of home internet service.

### **Expectations for Use of District Issued Technology Devices**

Responsible use of district issued technology devices is the same as use of classroom and lab computers that belong to the school -- it is ethical, respectful, academically honest and supportive of student learning. Each user has the responsibility to respect others in the school community and on the Internet. Users are expected to abide by the generally accepted rules of network etiquette. General student and employee behavior standards, including those prescribed in applicable board policies, the Student Code of Conduct and other regulations and school rules, apply to use of the Internet and other school technological resources.

Student who are issued district owned and maintained devices may be asked to sign a contract agreeing to district guidelines.

Users of school district technology resources are expected to respect school district property and be responsible in using the equipment. Users are to follow all instructions regarding maintenance or care of the equipment. Users may be held responsible for any loss or damage caused by intentional or negligent acts in caring for devices while under their control. The school district is responsible for any routine maintenance or standard repairs to school system devices.

### **Use of Personal Technology Devices**

Use of all personal electronic devices—including smart-phones, laptops, tablets, readers, handheld devices, storage devices, etc.—used on district property or attached to the district network is subject to all guidelines of the Responsible Use Guidelines and the Student Code of Conduct. A laptop, tablet or phone may belong to the user but the network belongs to Humble ISD. Therefore, all Humble ISD network rules apply. Any personal devices that disrupt network operations, Humble ISD has the right to discontinue future use and the user may be liable for restitution for damages and/or disciplinary action.

Responsibility to keep the personal technology secure rests with the individual owner. Humble ISD is NOT responsible for any costs incurred due to the use of personal technology. In addition, Humble ISD is not liable for any device stolen or damaged on campus. The district cannot replace or provide financial restitution for any stolen or damaged personal technological device.

Furthermore, users must agree to the following conditions:

- Personal electronic devices cannot be used to bypass the district internet filter. Internet access is filtered by the District on personal devices in the same manner as District-owned equipment. Devices which utilize their own personal cellular network (i.e. 3G, 4G, LTE, etc.), cannot be monitored through district resources. Students using cellular service to bypass the district filter may be subject to disciplinary action.
- Although the District provides the ability for students to bring their personal electronic device to school, a student will not be required to bring a personal electronic device as a factor in grading or assessing student work. Students who do not have access to personal electronic devices will be provided with a comparable District or campus-owned device on which to complete the assignment OR given similar assignments that do not require access to electronic devices.
- Each user is responsible for his/her own device: set-up, maintenance, charging, and security. District personnel will not support, diagnose or repair personal devices.
- The technology may not be used to cheat on assignments or tests, or for non-instructional purposes in the classroom.

- Students are prohibited from trading or selling personal devices to other students while on school property including buses, or attending any school-sponsored activity.
- Personal devices should not be used to record, transmit, or post photographic images or video of a person, or persons for non-instructional purposes while on school property including buses, or attending any school-sponsored activity on campus during school activities and/or hours
- Personal electronic devices are only to be used for educational purposes at the direction and under the supervision of a classroom teacher. Although the district provides the ability to access electronic resources on personal electronic devices, the use of personal electronic devices during the school day is at the discretion of teachers and other campus personnel.
- The teacher and campus administrators have the right to prohibit the use of personal electronic devices at certain times or during designated activities (i.e. campus presentations, theatrical performances, guest speakers, etc.) that occur on campus.
- An administrator may examine a student's personal telecommunication device and search its contents, in accordance with disciplinary guidelines and the law.
- Printing from personal technology will not be possible at school.
- Use of personal devices to make phone calls in common areas and/or after school hours will be determined by the campus administration.

In addition, Humble ISD is

NOT responsible for stolen or damaged personal technology devices,  
NOT responsible for the maintenance or repair of any personal technology, and  
NOT responsible for any costs incurred due to the use of personal technology.
