SUBTRACTION

Subtraction Strategy	Problem	Example
<p>Adding Up</p>	<p>72 - 38</p>	<p style="text-align: center;">72 - 38 is the same as 38 + ____ = 72</p> <p>Anita used the 100 chart to add up.</p> <p>$10 + 10 + 10 + 4 = 34$</p>  <p style="text-align: center;">Henry kept adding 10 until he got close to 72.</p> <p style="text-align: right;"> $38 + 10 = 48$ $48 + 10 = 58$ $58 + 10 = 68$ $68 + 4 = 72$ $10 + 10 + 10 + 4 = 34$ </p> <p>Lonzell used the number line to add up.</p> <p style="text-align: right;">$30 + 2 + 2 = 34$</p> 
<p>Subtracting One Number in Parts</p>	<p>72 - 38</p>	<p>Amaya drew 72 stickers.</p>  <p>To cross out 38, she had to change one strip to singles.</p>  <p>She counted how many were left. "10, 20, 30, and 4 more is 34."</p> <p>Roshaun drew 72 stickers, crossed out 38, and counted how many were left.</p>  <p>Tia used the 100 chart. She started at 72 and counted back 38. She subtracted 2 first, then 30, then 6 more. 34 were left.</p> <p>$72 - 38 = 34$</p>  <p>$72 - 38 = \underline{\quad}$</p> <p>$72 - 2 = 70$</p> <p>$70 - 30 = 40$</p> <p>$40 - 6 = 34$</p>
